- Certificate in Drone Intelligent System Workshop (College)

WORK EXPERIENCE

I have completed a 3-month internship as a Web Developer at HARTRON Skill Centre, Ambala City, where I was responsible for managing organizational websites, maintaining compilers, and mentoring students in developing their web-based projects.

Currently, I am serving as the Team Leader at the GMN College Startup Incubation Centre, where I lead technical projects, oversee development tasks, and collaborate with my team to deliver innovative web solutions.

These experiences have strengthened my expertise in HTML, CSS, JavaScript, PHP, and MySQL, while enhancing my leadership, project management, and problem-solving skills in a practical environment.

PROJECTS

- Vendor and Distributors
 - Description : A platform designed to connect vendors and distributors, featuring inventory management and listing functionalities.
